

Release Notes for RICOH InfoPrint XT 3.4.3.0 for Linux

Release Notes

Overview

This release incorporates all InfoPrint XT for Linux enhancements and fixes developed since the original InfoPrint XT release.

The version number for this release is 3.4.3.0 on Linux.

The ISOs provided for customer download incorporate the InfoPrint XT 3.4 base code with limitations.

Customers still using InfoPrint XT 3.3.0.x or 3.4.0.x must uninstall their current installation, and then install version 3.4.3.0

Final Release Date

Final Release Date: July 31, 2026

Description

What's New in this Release

- Added support for Color in Data Streams and Raster Image Fonts.
- Removed the Micro Focus runtime environment dependency.
- The functionality from previous releases is preserved with several limitations.

Problems Fixed in This Release

This release contains fixes for these defects:

- Micro Focus dependency removal.
- Added support for Color in Data Streams and Raster Image Fonts.

Limitations

- InfoPrint XT is an extensively proven Xerox conversion product that supports the most common capabilities of LCDS and metacode. There are some exceptions. Consult the InfoPrint XT publications for known limitations.
- InfoPrint XT does not support DBCS Resource and Data Stream Conversion feature in the 3.4.3.0 release.

Performance considerations

InfoPrint XT typically converts formatting and control resources separately from job conversion. Combined with an extremely efficient dynamic data stream converter and enhancements described in this AMD, this means performance is rarely a concern when processing jobs. See [What's New in this Release, p. 2](#).

Customer Responsibilities

The customer is responsible for installing and using InfoPrint XT according to documented procedures and for using the product in accordance with the Ricoh Software License Agreement (RSLA).
