1. Overview

- **Benefits**
- **Requirements**
- **Limitations**

The PS2PDF transform converts PostScript and Encapsulated Postscript(EPS) files into Adobe Acrobat Portable Document Format (PDF) files.

Benefits

The PS2PDF transform gives you these benefits:

- The product is available on a wide selection of supported operating systems, like Windows, Linux and AIX.
- The client has the option to set encryption on resulted PDF that limits user's ability to print, modify or copy content using Adobe Acrobat or Adobe Reader.
- The client has the option to set linearization for the output PDF file.

Requirements

Transform client requirements:

- Microsoft Windows Server 2016 Standard or later
- Microsoft Windows 10 Pro, Enterprise or later
- IBM AIX 7.1 or later
- Linux kernel 2.6.32 or later (x86_64)

End-user client requirements:

- Adobe Acrobat
- Acrobat Reader

Limitations

The current limitations with the PS2PDF transform include:

- Encryption method revision number is V2 from PDF reference documentation.
- Permissions apply correctly when both owner and user passwords are specified.
- Linearization is incompatible with producing an encrypted (password protected) PDF file. Linearization is ignored when used together with encryption.

2. Installing a Permanent License

To use PS2PDF Plus you need a licence. You must install a permanent licence on the computer where the product is installed.

To install a permanent license for PS2PDF Plus:

1. Make sure that you have the e-mail containing the entitlement ID (EID) that you received from Ricoh.
2. If the computer where PS2PDF Plus is installed does not have Internet access:
 1. Log into a computer that has Internet access.
 2. Use the Remote Desktop Connection to connect to the computer where PS2PDF Plus is installed.
3. On the computer that has Internet access, go to this Web site: <https://dl.ricohsoftware.com>.

2

What action would you like to take?

4. Click **Software Activation** on the right side of the screen.
5. In the **Software Activation** dialog, insert the EID and the system fingerprint.

A screenshot of a 'Software Activation' web form. The form has a teal background. At the top, the title 'Software Activation' is in white. Below it, a white text block says 'Use the form below to activate your software. Enter your Entitlement ID and the System Fingerprint generated by the software.' There are two white input fields. The first is labeled 'Enter your EID:' and has a white question mark icon to its right. The second is labeled 'Enter your System Fingerprint:' and also has a white question mark icon to its right. At the bottom center is a white button with the text 'Confirm Content'.

1. Copy and paste the EID from the e-mail you received from Ricoh.
2. To obtain your machine fingerprint open a command prompt and run the command `ps2pdf -f`. Copy your machine fingerprint. This action copies the 16-character system fingerprint that uniquely identifies the computer where PS2PDF Plus is installed to the clipboard.
3. Return to the Software Activation webpage. Paste the system fingerprint in the **Enter your System Fingerprint** field.
4. Click **Confirm Content**.
6. In the **Activation Content Confirmation** dialog:
 1. Review the confirmation information.
 2. Click **Activate**.

You will receive a confirmation that your software has been activated. A license key is generated with an Activation ID for the client computer and is displayed on the screen.

9. If you are finished, close the browser tab. To restart the process, click **Start Over**.
10. Copy the license file in the same location where PS2PDF Plus is installed.
11. You can start using the PS2PDF transform.

3. Using the PS2PDF Transform

- Command syntax
- Parameters

The PS2PDF transform consists of a command-line interface and multiple configurable parameters.

Command syntax

The syntax for the ps2pdf client command is::

```
ps2pdf.exe <-a perms> <-f> <-l> <-o pw> <-p size> <-u pw>input_fn <output_fn>
```

Parameters

The following parameters are required:

-a perms

Encryption permissions pcsa (p: no printing, c: no changes, s: no selection, a: no adding notations).

- This parameter is used only with the **-o** parameter; otherwise, **-a** permissions are not applied.

-f

Get system fingerprint for license activation.

-l

Linearize PDF.

Note

- This parameter is used without any encryption parameters.
- The Acrobat user interface refers to this as 'Optimised for Fast Web Viewing'.

-o password

Encryption PDF Owner Password.

-p size

Paper size.

 Note

- Paper size is affected by this parameter when the paper size value is not specified in the PS input stream.
